

HOMERTON
CONFERENCE CENTRE

CSR POLICY

Corporate Social Responsibility (CSR) has become a business necessity over the last few years and many of our customers have started to make their choices on the basis of a venue's CSR credentials. Here at Homerton Conference Centre we recognise that, as a venue, the impact we have on the environment and on our community can be significant. That is why we take CSR so seriously and have developed key strategies which allow you, the customer, to make an informed decision.

We aim for continuous improvement in the following areas:

- Sustainability – striving to ensure energy efficient practices, minimising waste, reducing consumption, working with like-minded suppliers
- The Environment - recycling and reuse of conference materials and housekeeping products
- Social Engagement – consideration and fair treatment of those around us, hosting charitable events, treating staff with respect and encouragement

Through continuous recognition of these principals we can ensure our duties towards our staff, the environment and the communities in which we operate are met. Working with the wider college environment we work hard to 'do our bit'.
